FYI. Letter is about legislation that would prohibit DEP from including certain effluent limits in permits. The pollutant of concern is ionic pollution – typically measured as conductivity.

I think Sylvia will be the lead working with R3 and OWM.

Attached is a letter to Avi from NGOs asking for a meeting regarding revisions to west virginia's npdes program related to coal mining (refers to taking narrative permit conditions in their permits). Can you pls take a look and advise as to whether Avi should take a mtg. Should reach out to OWM to see if they made a similar request and decide between the two offices who should have the mtg and also give a heads up to region 3.

Thanks.
